## FACTORY FINISHING

*Harring Doors offers the highest quality factory finishing available to the market.*

*Our wiping stains are specially formulated to create a natural stain effect that allows the grain to show through which enhances the woods unique characteristics. We have a number of standard colors and are capable of matching any color\* that you may desire.*

*Harring Doors uses a new generation of catalyzed conversion varnish that was specifically designed for wood surfaces where extreme moisture and chemical exposure is a concern. Used as a top coat on interior doors, it helps to enhance the natural beauty of the wood grain. It can also be used on its own to achieve a clear finish.*

*On our exterior doors, durable exterior finish helps protect the wood from harmful ultraviolet rays while allowing moisture to escape the wood. This leaves excellent clear visibility of the wood grain pattern.*

*\*See the "FACTORY FINISHING" section of your "PRODUCT INFORMATION MANUAL" for more details of our Factory Finishing. "MAGNALAC PRIMER" for paint grade surfaces is also available.*
