SMS Enterprise Software

OVERVIEW

The Vanderbilt Industries Security Management System delivers a powerful, single source solution for integrating a facility's access-control technologies, digital video, and alarm monitoring systems.

The Enterprise system is perfect for large, multi-site or global organizations. It supports an unlimited number of cardholders and readers and gives you unparalleled flexibility by supporting both online and offline devices. The Enterprise system also enables an organization to manage facility administration from any location and provides real-time monitoring and audit trails.

With the SMS Web application, administrators have convenient access to critical system functions such as granting or denying cardholder access, facility lockdown and more.
